Career Objective

Aspiring software developer with strong analytical and problem-solving skills. Proficient in Java, C, Python, and data-driven techniques, with a keen interest in innovative technology and software development. I seek an opportunity to apply my technical expertise and problem-solving abilities in a dynamic development environment to build efficient solutions that meet customer requirements and contribute to global business growth. I am eager to collaborate with a team and leverage my skills in engineering to drive impactful projects within a collaborative network.

Technical Skills

- Programming Languages: C, Python, JavaScript, Java, PHP
- Frontend Technologies: HTML, CSS, JavaScript, Bootstrap, React (Basics)
- Backend Technologies: Node.js, Django
- Databases: MySQL, Oracle, SQL, SQLite3
- Tools & Technologies: Git, OpenCV, Tally

Education

Master of Computer Application (MCA) | 7.76 CGPA **2023 - 2025**
Silicon University, Bhubaneswar, Odisha

Bachelor of Science (Physics Hons.) | 6.62 CGPA **2020 - 2023**
Govt. Autonomous College, Phulbani, Odisha

Class XII (CHSE) | Aggregate: 56% **2018 – 2020**
Nalanda H S School, Berhampur, Odisha

Class X (BSE) | Aggregate: 71% **2017 - 2018**
Saraswati Vidya Mandir, Phulbani, Odisha

Projects

Hostel Management System
Technologies: Python, Django, HTML, CSS, Bootstrap, SQLite3
- Implemented modules for hostel, block, floor, room, bed management, student profiles, bed allocation, visitor tracking, meal scheduling, and food attendance with role-based access control.
- Designed responsive user interfaces and developed efficient backend logic using the Django, ensuring accurate room allocation, data integrity, and simplified hostel operations through relational database management.

Human Resource Management System
Technologies: Python, Django, HTML, CSS, Bootstrap, SQLite3
- Implemented core modules including employee management, attendance tracking, leave management, payroll calculation, salary slip generation, and role-based authentication with efficient database relationships.
- Designed responsive user interfaces and optimized backend logic using the Django, ensuring accurate payroll calculations, secure data management, and improved administrative efficiency.

Digital Exam Registration & Admit Card System
Technologies: PHP, MySQL, HTML, CSS, JavaScript, Bootstrap
- Designed as a solution to address gaps in the existing university ERP exam module.
- Proposed features include student-driven exam registration and auto-generated admit cards.
- Focused on simplifying backend data flow and reducing manual intervention.

Training

- Python Core to Advanced – Ingenious Tech World
- Python Programming (Application & Programming) – Syllogistik System Ltd.
- Python Full-Stack Development – GVI Technology, Bhubaneswar

Interests

- Building side projects in full-stack development and AI.
